Host of the "ChemHelp" Environmental
Protection & Education Service Center

DPS Technical Inc.

Fellow members of the Motorcycle Industry Council, I have had the honor of being nominated for a position on the Board of Directors for the MIC. I have considered this carefully, and am asking for your support and vote for this position.

For over thirty years I have been an active motorcycle rider and business principal within the motorcycle industry, and have worked on numerous complex challenges that impact our industry.

My position within the motorcycle and technical community is one of taking complex mechanical and environmental challenges and finding a workable solution for the manufacturers, consumer's and regulatory agencies.

For the past twelve years I have owned my consulting practice and have worked on issues such as the West Yellowstone snowmobile environmental impact challenge, The State of California OHV Noise study, and noise challenges that the motorcycle industry as a group must contend with.

I am committed to our industry and have the proven reputation of ethical conduct and will base my MIC voting and MIC actions upon proven scientific methodology, and the commitment to the motorcycle industry that we all share.

Please feel free to contact me personally if you have any questions.

I would sincerely appreciate your vote.

Respectfully,

Chris Real, CLS
